

# FCAAP'S MEDICAL HOME PROGRAM

**FCAAP's Medical Home Program** is an exclusive benefit offered only to FCAAP members! The Program, developed in collaboration with The Verden Group and funded by UnitedHealthcare, is designed to provide Florida's pediatric practices the resources, tools, and support needed to understand, select, and complete a medical home program and achieve medical home recognition.

In addition to the free resources and tools and significantly discounted consultation services available to FCAAP members through the FCAAP Medical Home Program, FCAAP is also offering reduced membership for the first fifty (50) members who complete the Program and achieve medical home recognition! Each of the first fifty (50) members who achieve medical home recognition through FCAAP's Medical Home Program will receive a fifty percent (50%) discount on the next annual renewal of their FCAAP membership!

The FCAAP Medical Home Program is designed to provide our members with the following tools and resources:

- Simplified understanding of the three medical home programs (NCQA, AAAHC, and TJC) so that you can determine which program will work best for your practice
- Educational materials that help to explain the concepts and components of medical home programs
- A gap analysis survey that helps you to determine how much (or how little) work may be required to transition you to medical home recognition
- Tools that allow you to determine fee increases for becoming a medical home, the ability to calculate the investment required to become a recognized medical home, and tools to determine if you already have accumulated points for the NCQA program through participation in Meaningful Use and / or through your medical records vendor
- Cheat sheets and a guide to assist with understanding the NCQA's medical home program
- Template policies and procedures that meet the requirements of the NCQA program, that can be customized to reflect your specific practice's workflow
- Access to the consultants of The Verden Group's *Patient Centered Solutions* division and special FCAAP pricing for members that wish to utilize their services. *Pricing for consultation services is based upon the number of practice sites and primary care providers and will be provided to each practice during the registration process if consultation services are desired.*

UnitedHealthcare is pleased to support Florida pediatricians and the Florida Chapter of the American Academy of Pediatrics through funding of this program. The expansion of pediatric medical homes will ensure better access to high-quality services for our most vulnerable patients.

FCAAP is pleased to be working with The Verden Group to provide this program to FCAAP's members.
